

**EMPLOYMENT OF INSTRUCTION IN PROGRAM SUPPORTED BY SERVER  
APPLICATION TO CAUSE EXECUTION OF PROGRAM UNSUPPORTED BY THE  
SERVER APPLICATION**

**ABSTRACT**

- 5        A component of a system receives a first instruction at a server to execute a target program that is unsupported by a server application. The server application is located on the server. A component of the system employs a second instruction in the supported program to cause execution of the target program. The second instruction is based on the first instruction. The supported program is supported by the server application.
